

Date:

Wednesday Challenge Form

Group Members: Raul, Christian

Problem Statement: We had to make a sketchup of an “E” then pass to another group and have them bring it to life (us aswell).

Approach: Keeping in mind that we have to only turn in one of the E’s, we took our time to make our sketchup as detailed As possible. What we did was we wrote the measurements down on the “E” to make as easy as possible for the other group to put it together.

Solution: Our sketchup that we received was done incorrectly.. the measurements were in feet so we couldn’t build it because it was so big.

Lessons Learned: If every group took their time on making the “E” there wouldn’t be any messups.
